

Getting Started with ConfigCobra

Follow these simple steps to set up ConfigCobra and run your first CIS compliance assessment for Microsoft 365.

Learn more at configcobra.com

⚠ Important License Requirements

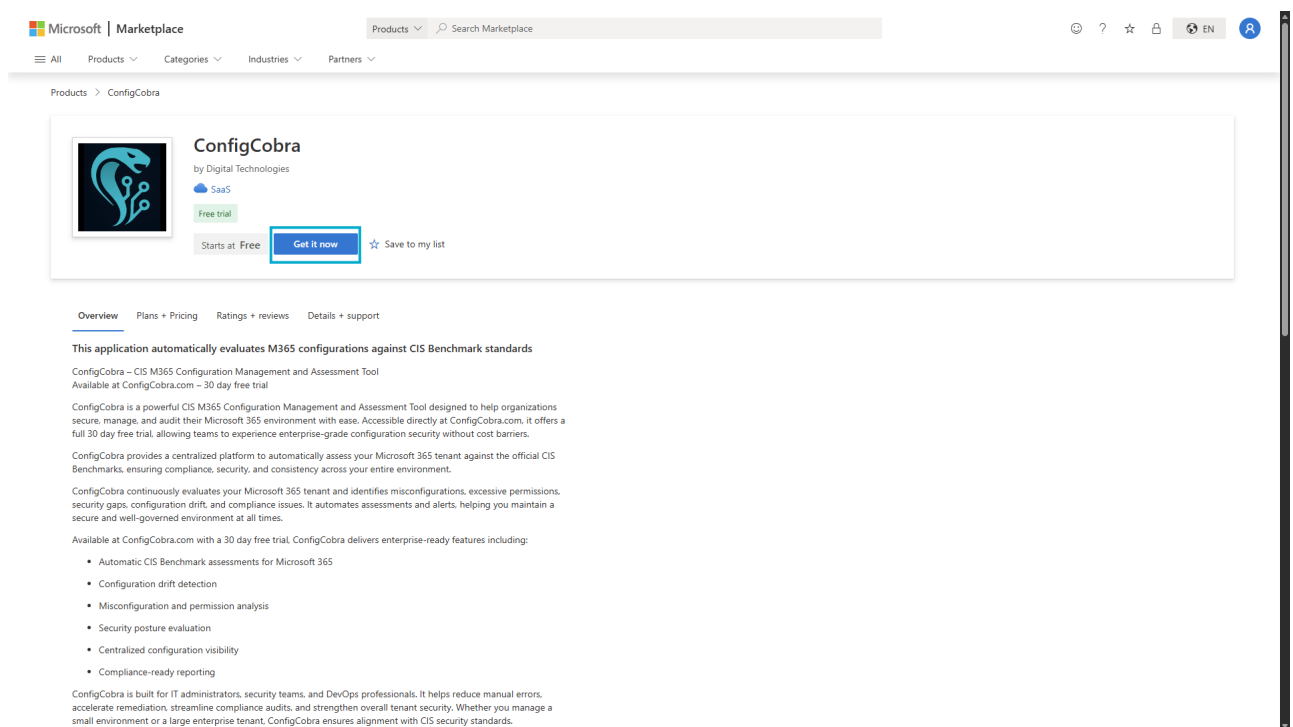

CIS Benchmarks are based on **Microsoft 365 E3 and E5 licenses**. Although we can scan some controls without them, having some kind of **Microsoft Defender license** (Defender for Office 365, Defender for Endpoint, or Microsoft Defender XDR) is a **minimum requirement** for full functionality.

Step-by-Step Setup Guide

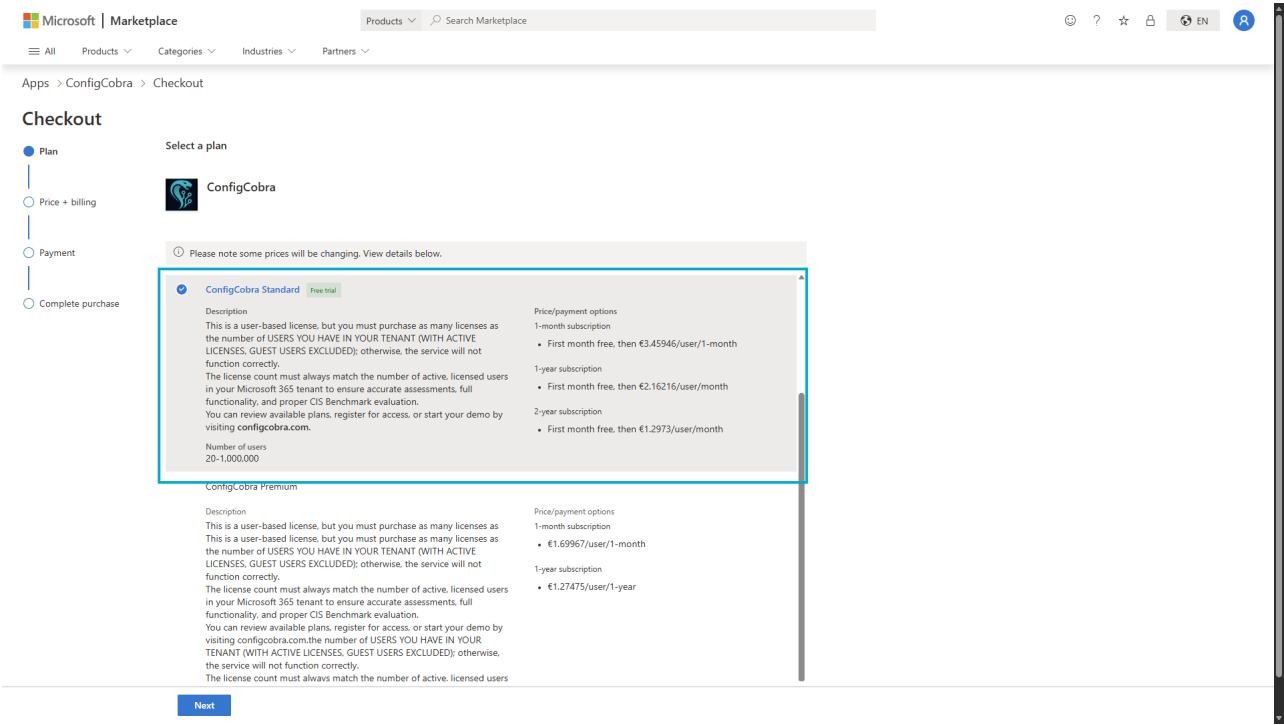

Step 1: Get started on Microsoft AppSource

Visit the [Microsoft AppSource marketplace](https://appsource.microsoft.com) to acquire your ConfigCobra subscription.

1. Go to Microsoft AppSource and press "Get it now"

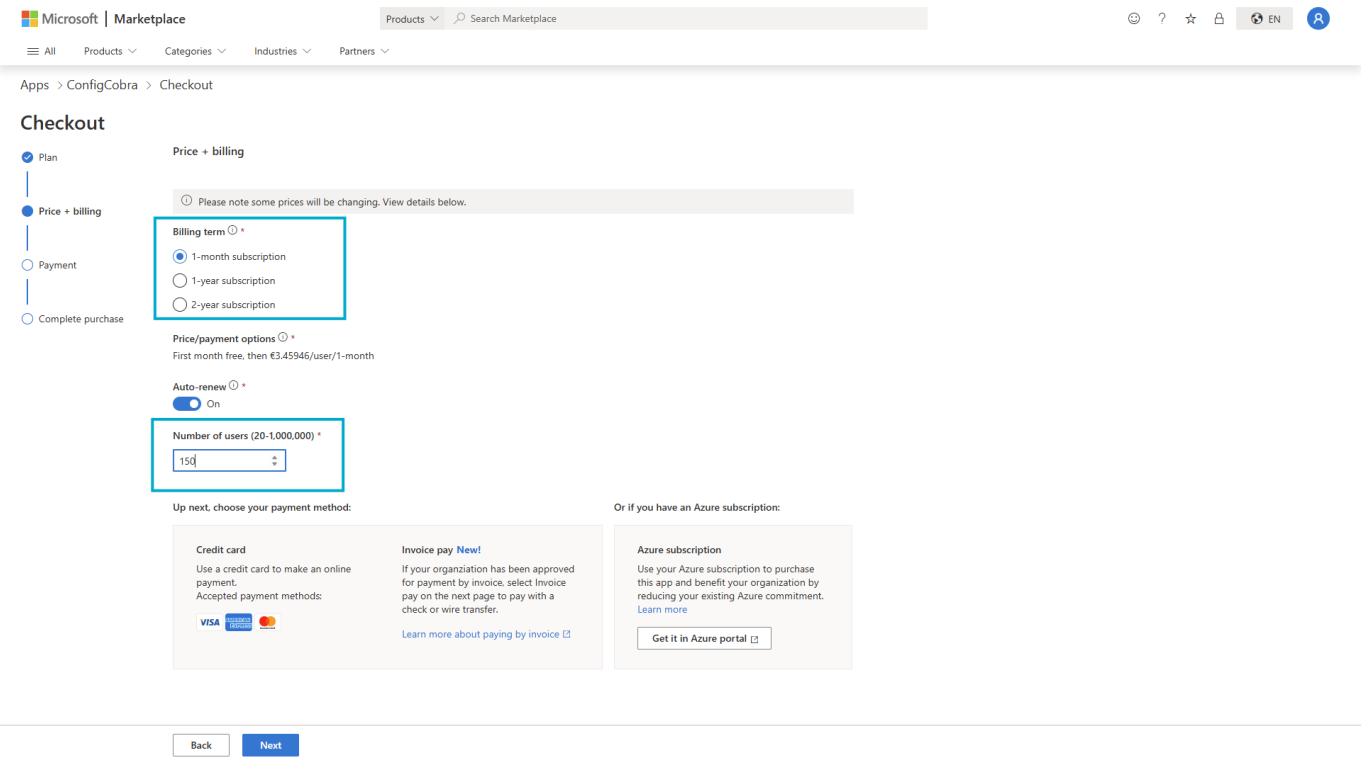

2. To acquire a free trial, please select the **Standard** plan

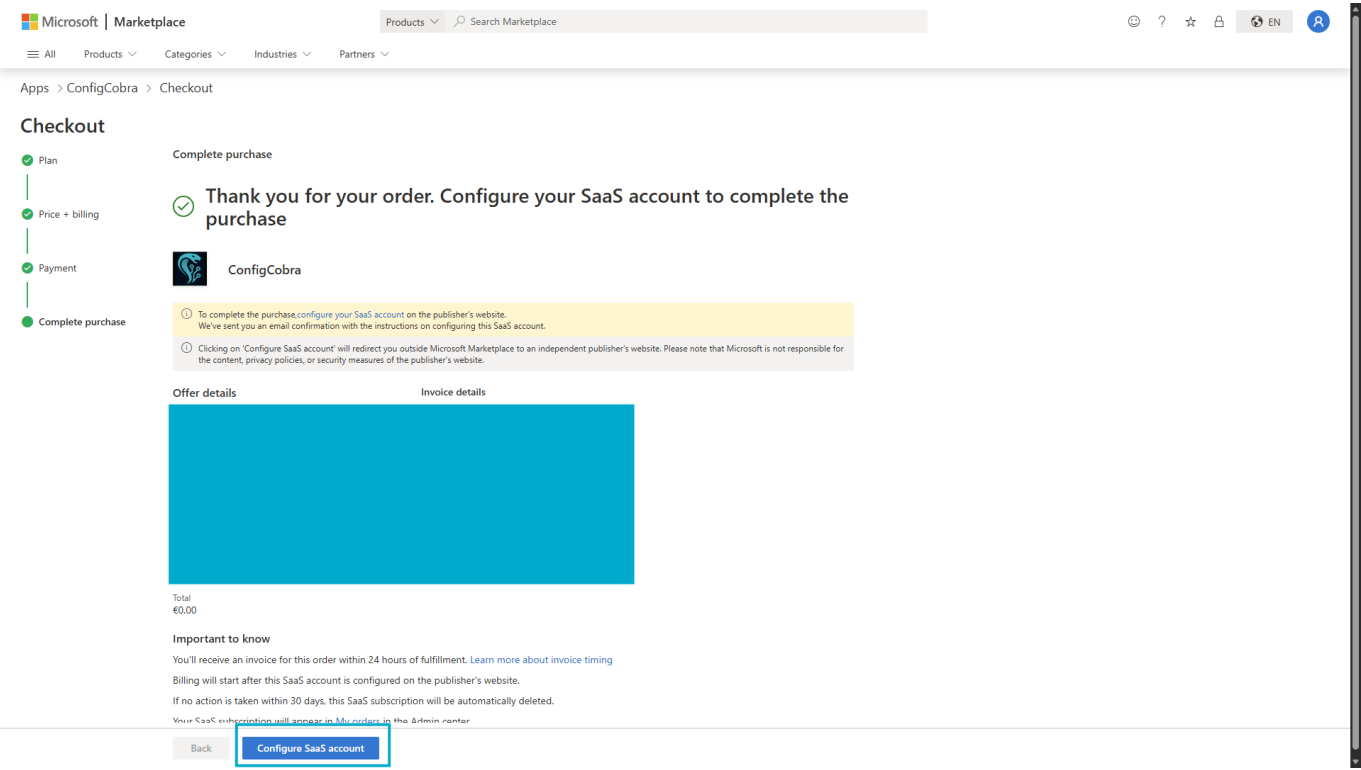

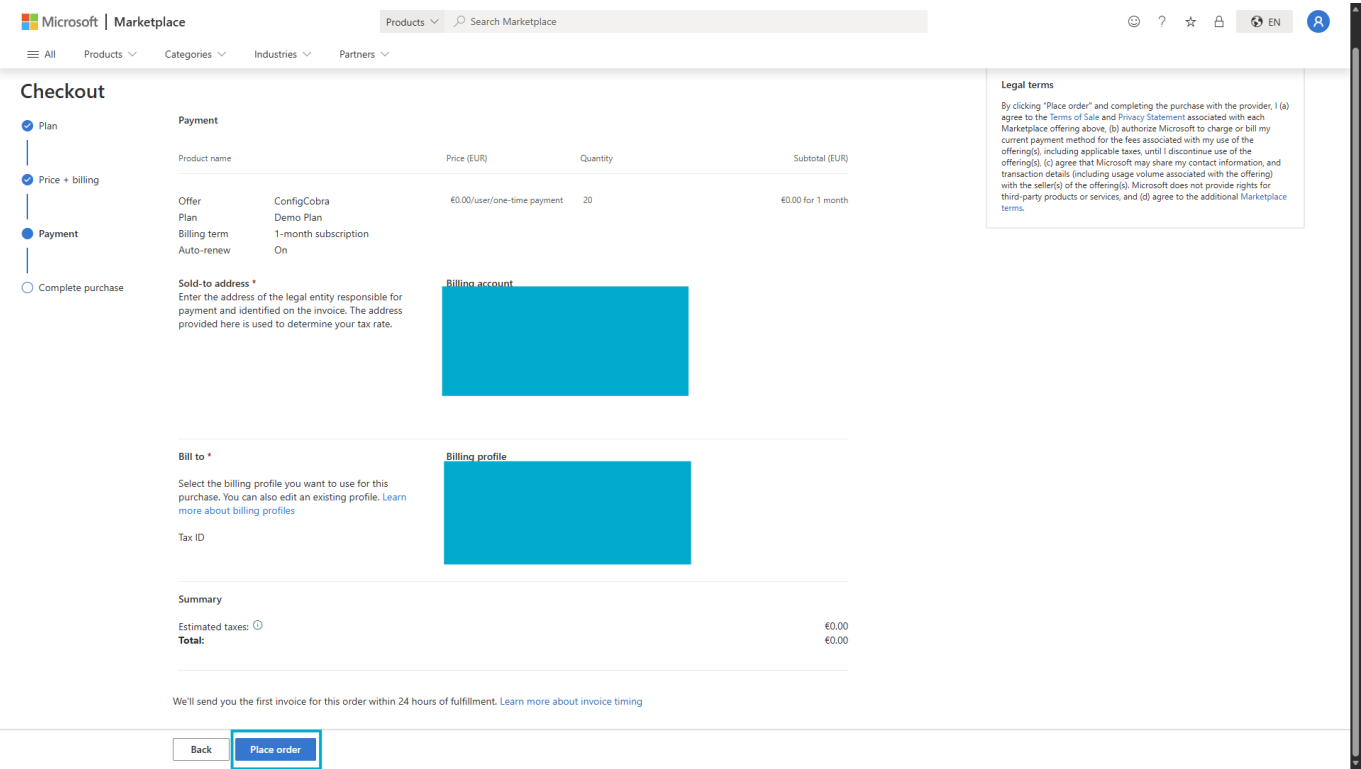

Step 2: Provide your user count

Enter the number of licensed users in your organization. **This is important** because the application only works if you have that many licenses as many licensed users you have (excluded guest users).

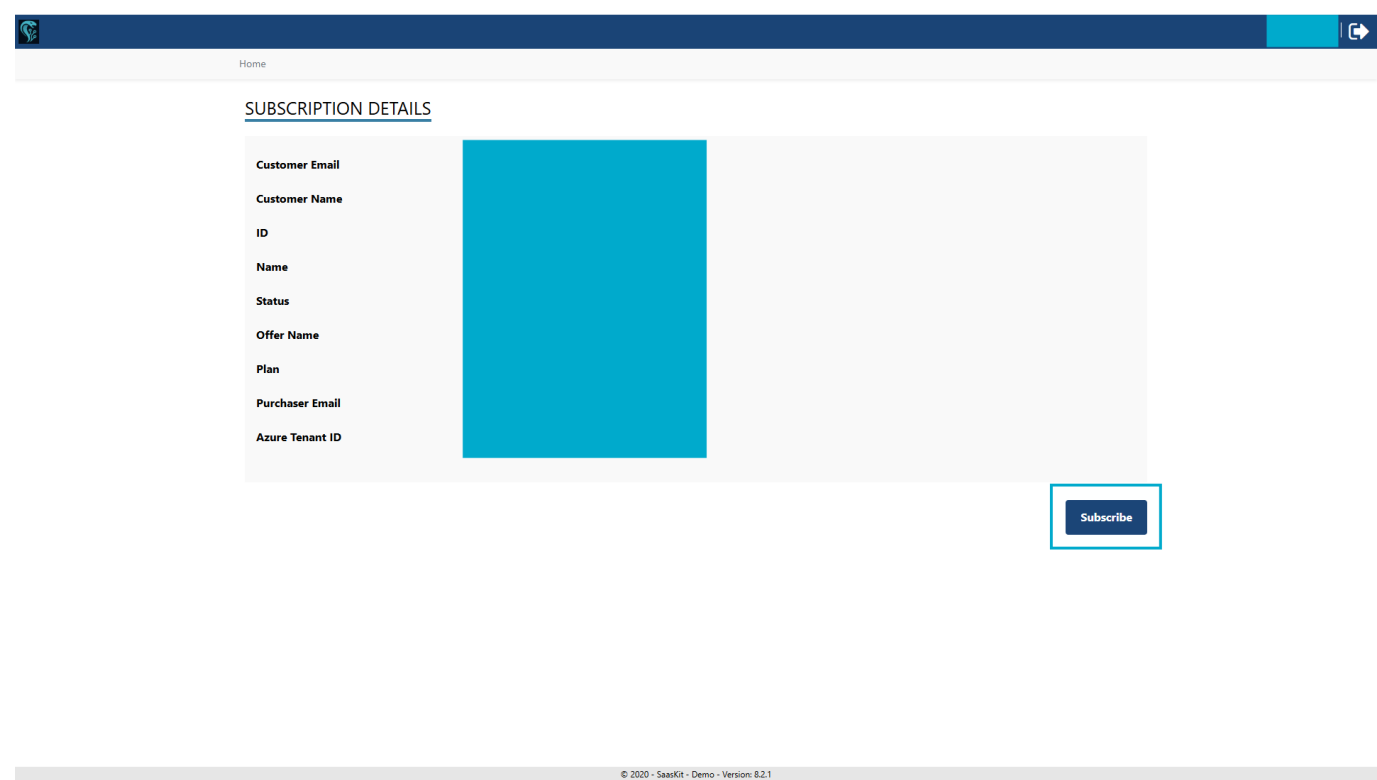

Step 3: Complete your order

Select your billing account and billing profile, then place your order through the Microsoft AppSource checkout process.

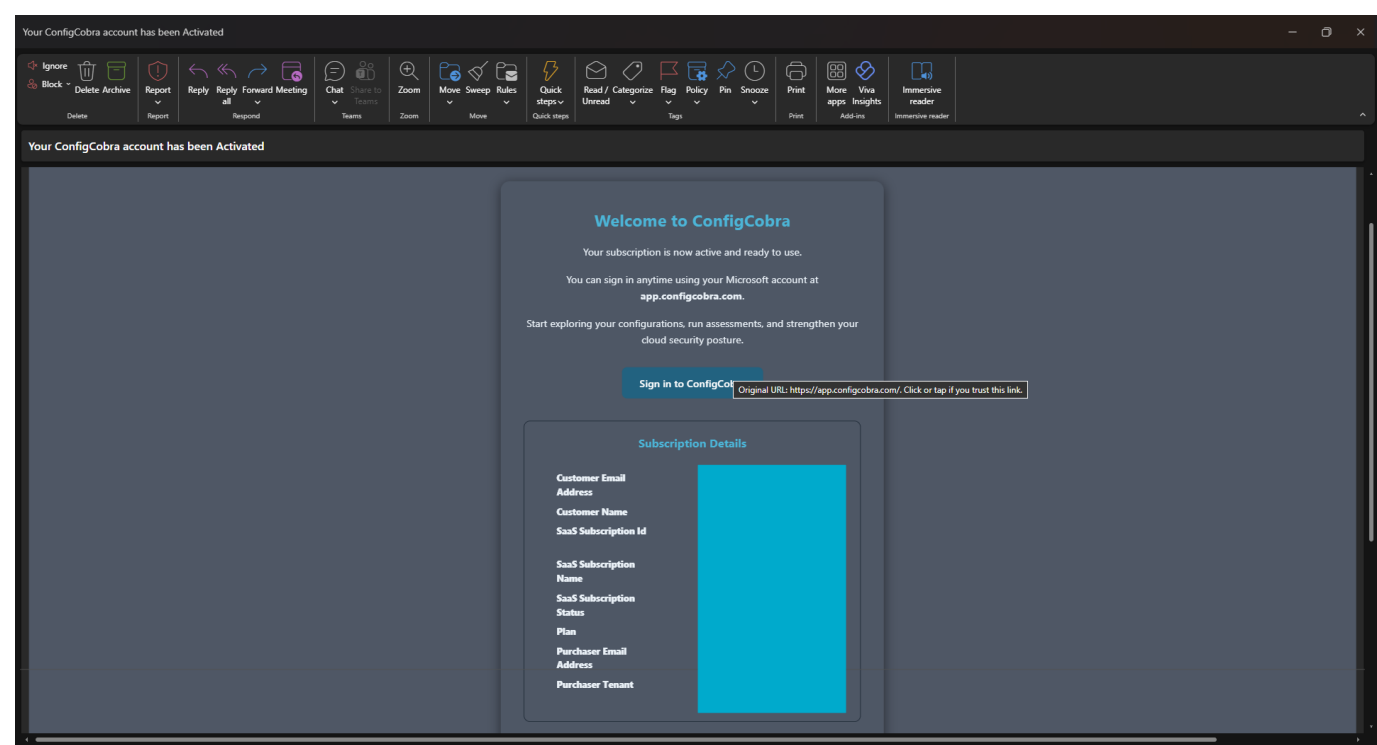

Step 4: Activate your subscription

Follow the activation link to our fulfillment platform and activate your subscription. This link will be provided after you complete your purchase on Microsoft AppSource.

Step 5: Receive confirmation email

Once your subscription is activated by our team, you will receive a confirmation email with your login credentials and next steps.

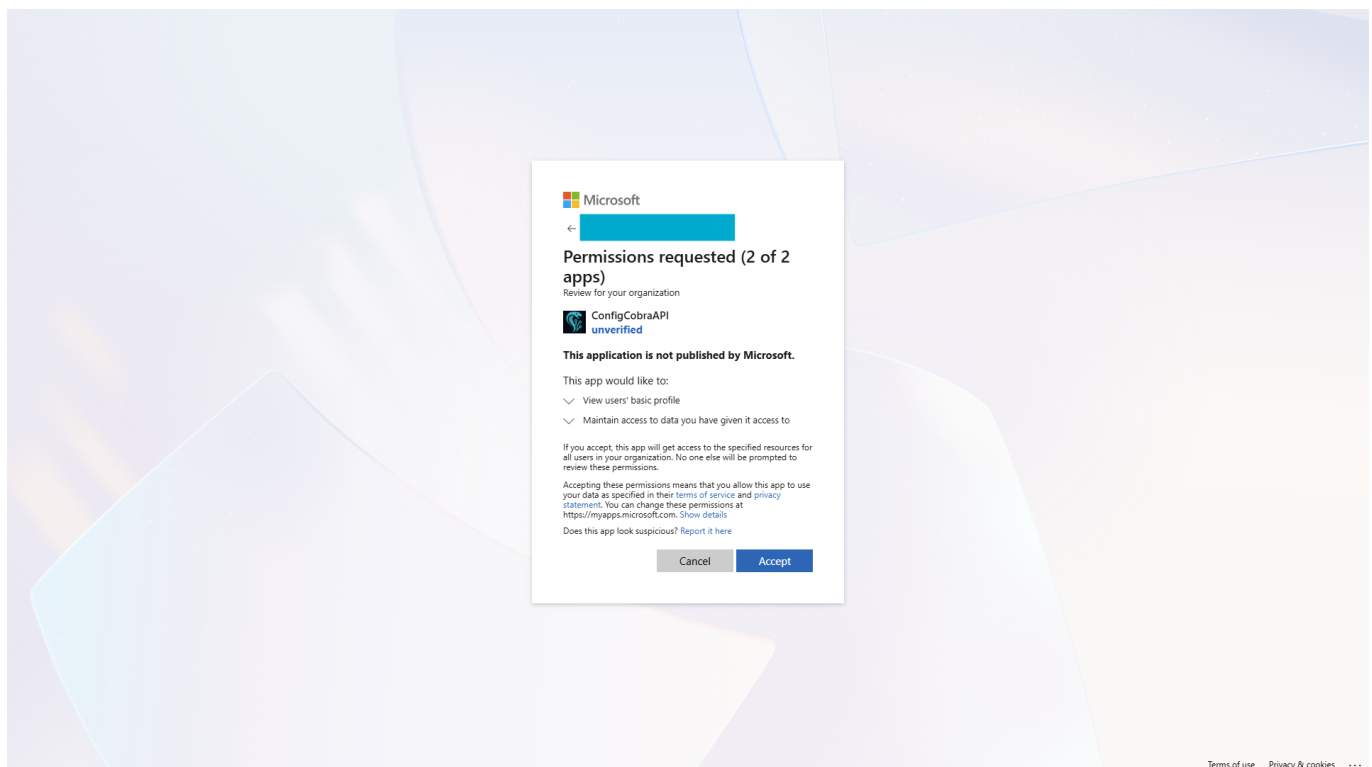

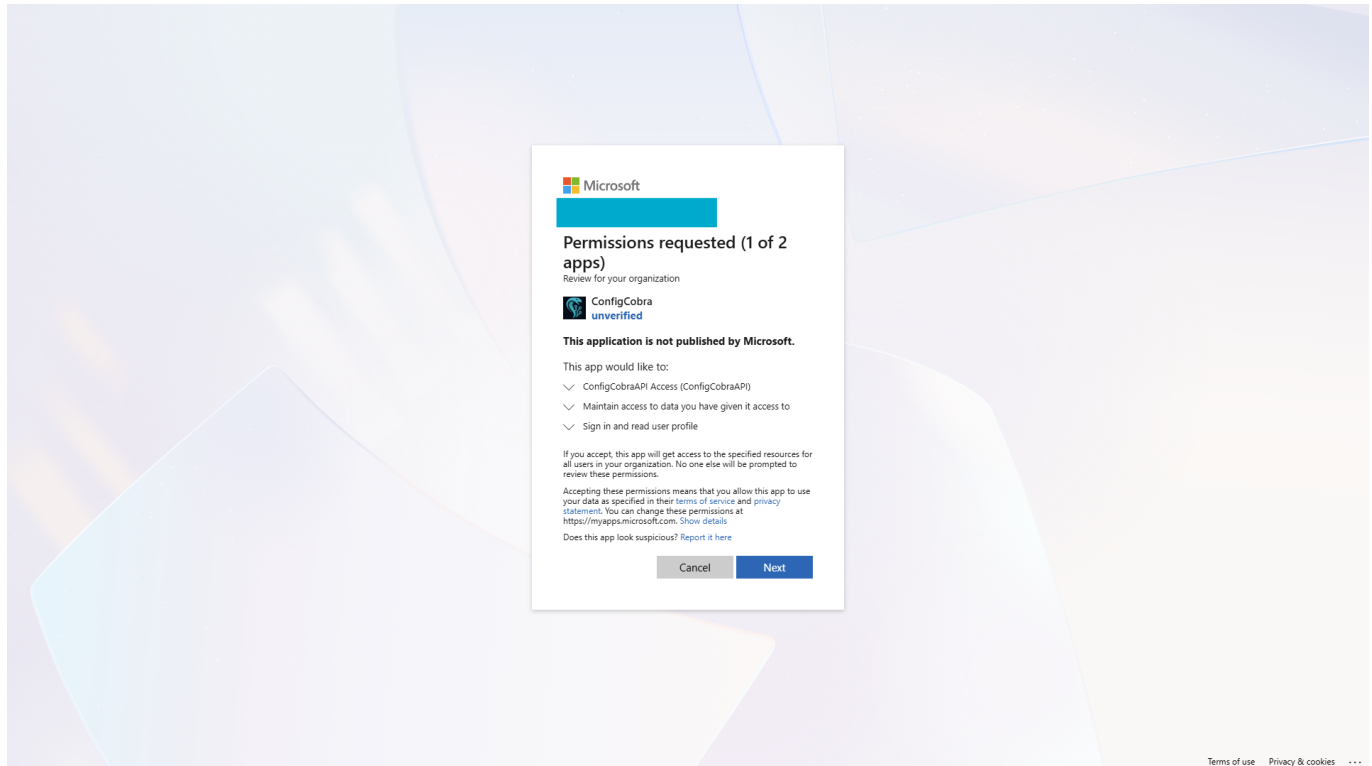

Step 6: Log in to ConfigCobra

Head to app.configcobra.com and log in using the credentials from your confirmation email.

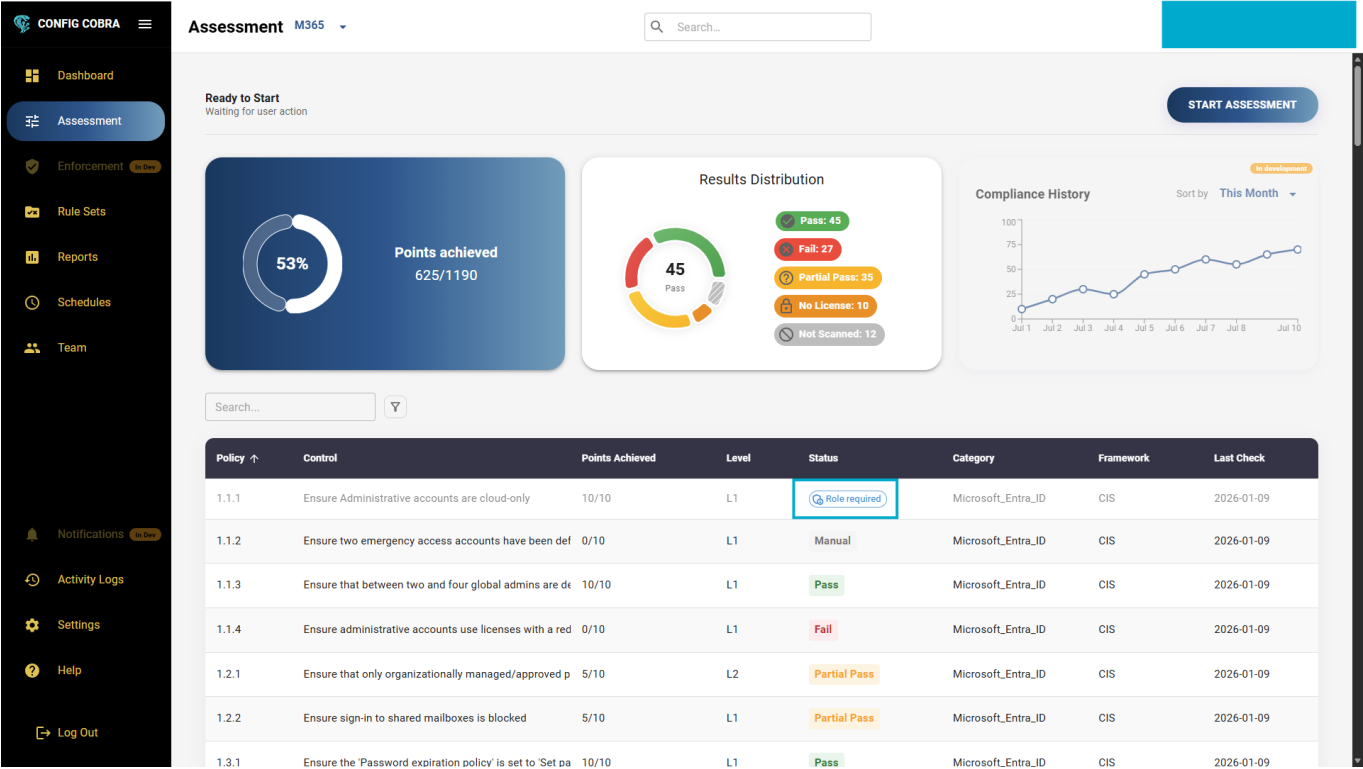

Step 7: Accept permissions

Accept all the permissions on the admin consent page. This is required for ConfigCobra to access and assess your Microsoft 365 configurations.

Step 8: Configure missing permissions

After login, go to the **Assessment page**. You will see some controls that have a **Role required** blue tag.

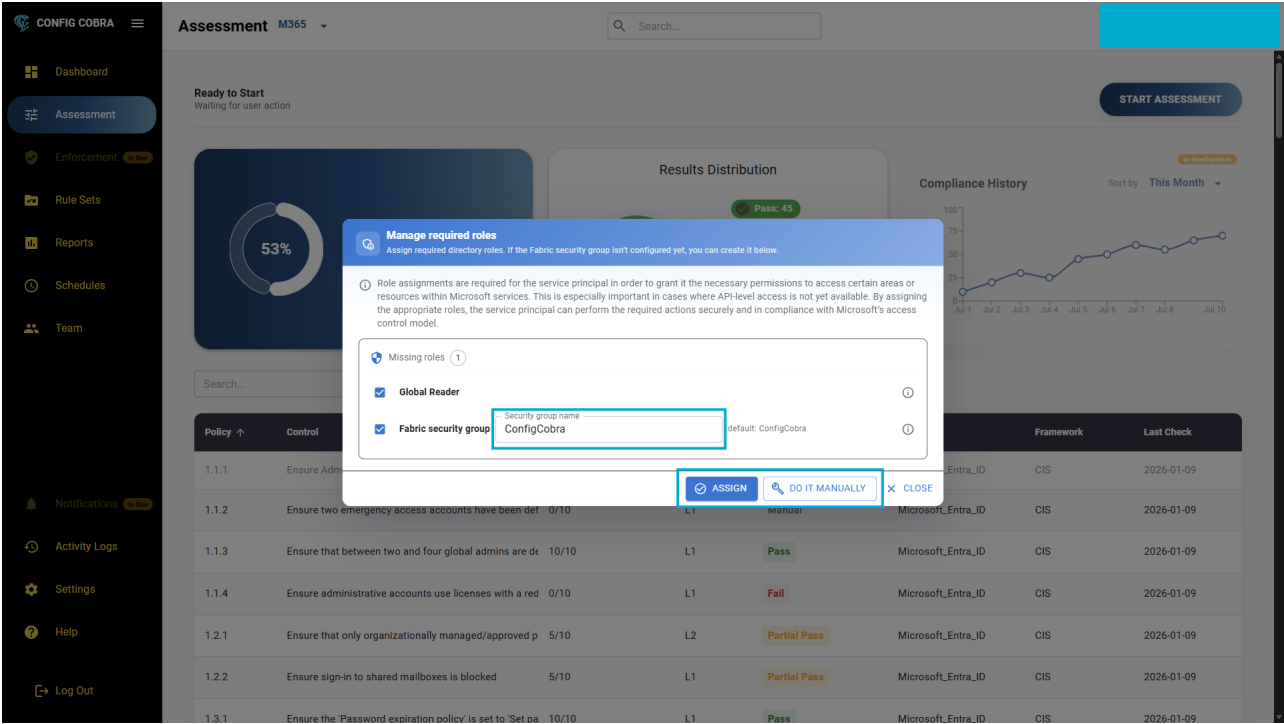

If you are an administrator:

- Select all permissions as an administrator and activate them

If you are a regular user:

- Send the instructions provided in the **Do It Manually** section to your global administrator to grant the necessary permissions

You're Ready!

Once you've completed all the steps above, you can navigate to the Assessment page and start running your first CIS compliance scan. ConfigCobra will automatically check your Microsoft 365 configurations against CIS Benchmark standards.

Visit configcobra.com for additional resources and support.
