

User Management

Manage team access, assign roles, and control permissions in ConfigCobra using Azure Entra integration.

Overview

All user management in ConfigCobra is handled with  **Azure Entra** (formerly Azure Active Directory). Only users from your  **subscribed tenant** can be added to your ConfigCobra team. This ensures secure access control and seamless integration with your existing identity management infrastructure.

 **Single Sign-On (SSO):** Users authenticate using their existing Azure Entra credentials, providing a seamless and secure login experience without separate passwords or accounts.

For more information, visit configcobra.com.

How to Manage Users

Step 1:  Log in to ConfigCobra

Log in at app.configcobra.com using your credentials.

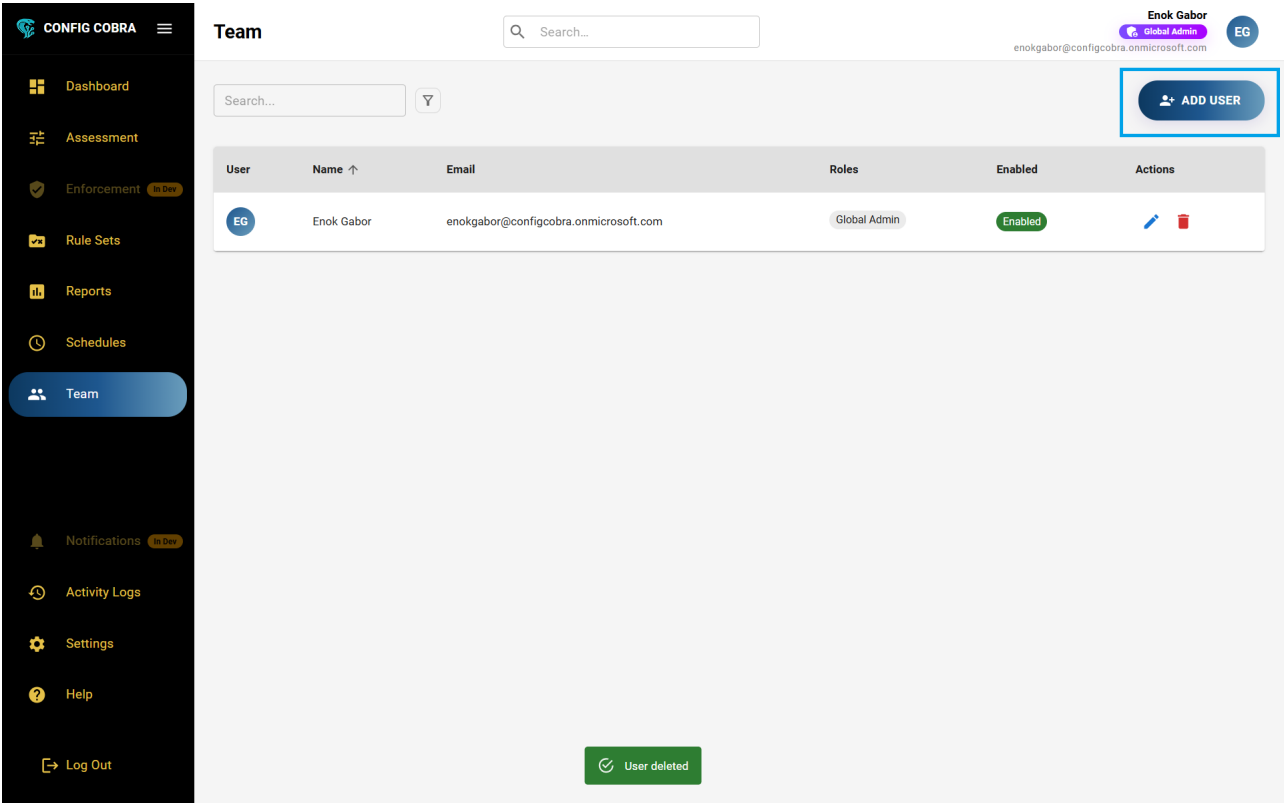

Step 2:  Navigate to Team page

Go to the **Team** page in the main navigation menu.

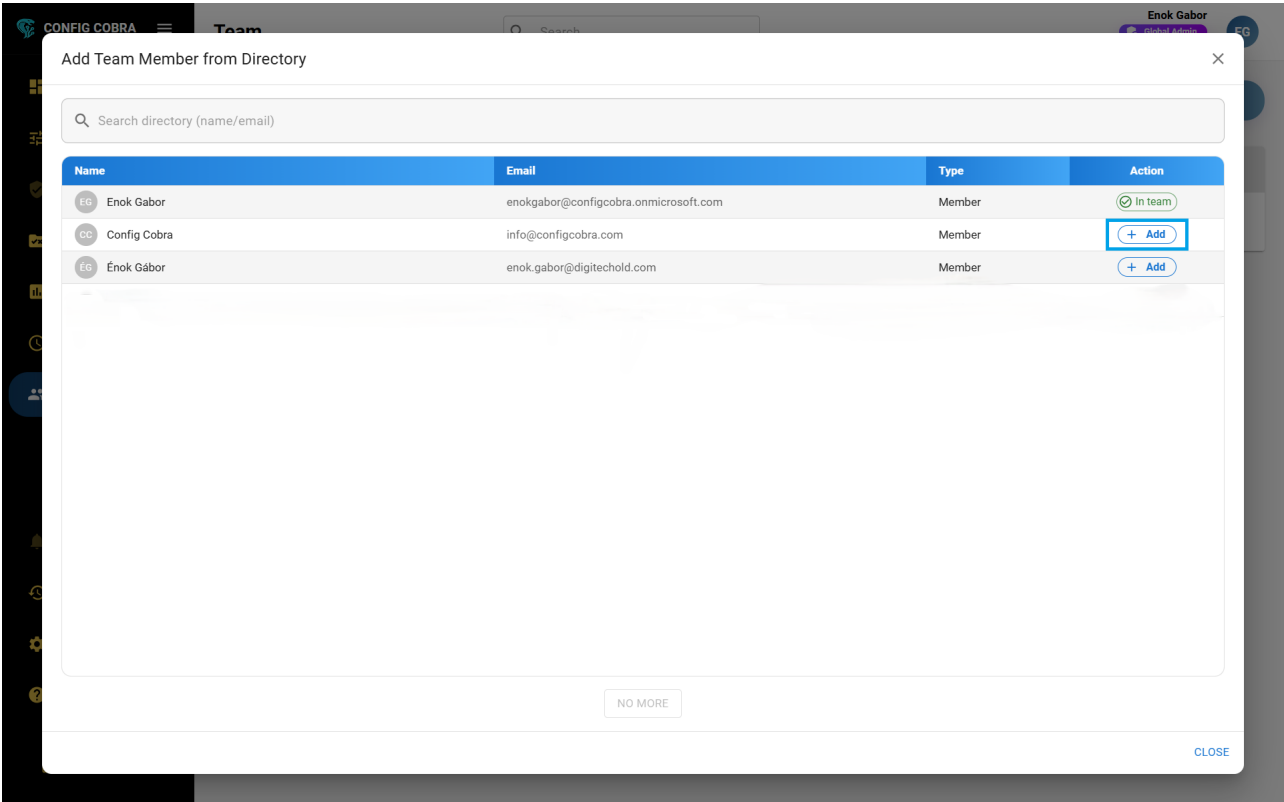

Step 3:  Add a new user

To add a user to your team:

1. In the top right corner, select "**Add User**"

2. 🔍 Search for the desired user in your Azure Entra directory

3. On the left side, press "Add"

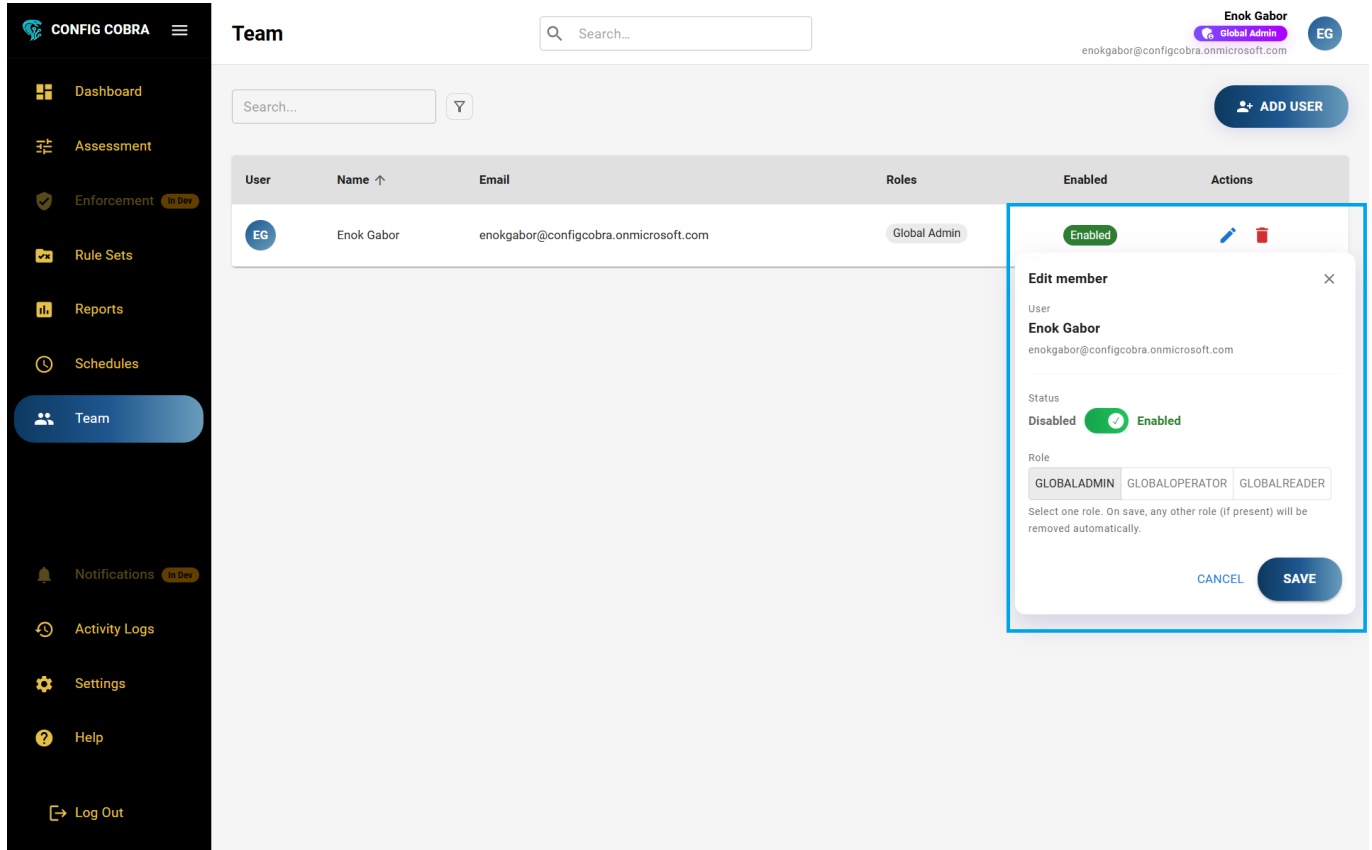

4. The button text changes to "In Team" and the user is added

🕒 **Default role:** New users are automatically assigned the **Global Reader** role by default. You can change this role in the actions menu.

Step 4: Change user role

To change a user's role:

1. In the **actions menu**, select the **edit icon** for the desired user
2. You can select from:  **Global Admin**,  **Global Operator**, or  **Global Reader**
3. Select the desired role and press **"Save"**

The screenshot displays the 'Team' management page in ConfigCobra. A table lists team members, with one user, Enok Gabor, highlighted. An 'Edit member' modal is open, showing the user's details and allowing role selection. The modal includes a status toggle (currently 'Enabled'), a role selector (with 'GLOBALADMIN' selected), and 'CANCEL' and 'SAVE' buttons.

User	Name ↑	Email	Roles	Enabled	Actions
EG	Enok Gabor	enokgabor@configcobra.onmicrosoft.com	Global Admin	Enabled	 

Edit member

User
Enok Gabor
enokgabor@configcobra.onmicrosoft.com

Status
Disabled ☐ Enabled ☒

Role
GLOBALADMIN GLOBALOPERATOR GLOBALREADER

Select one role. On save, any other role (if present) will be removed automatically.

CANCEL SAVE

Step 5: Delete a user

To delete a user from your team:

In the **actions menu**, press the **delete button** for the desired user. The user will be removed from your ConfigCobra team. This action cannot be undone.

Step 6: Email notifications

After adding, removing, or editing a user, each administrator receives a notification email. The affected user also receives an email notification about the change to their account or role. Learn more about [notifications](#) and how to configure your email preferences.

Understanding User Roles

ConfigCobra provides three role levels to control access and permissions. Choose the appropriate role based on each user's responsibilities and requirements.

Global Admin

Full administrative access to all ConfigCobra features, settings, and user management capabilities.

Permissions:

-  Manage all assessments and reports
-  Configure system settings
-  Add, edit, and delete users
-  Manage rule sets and schedules
-  Access all tenant data

Global Operator

Operational access to run assessments, view reports, and manage configurations. Cannot manage users or system settings.

Permissions:

-  Run and schedule assessments
-  View and download reports
-  Create and manage rule sets
-  Configure assessment settings
-  View dashboard and activity logs

Global Reader

Read-only access to view assessments, reports, and dashboard data. Cannot make changes or run assessments.

Permissions:

-  View assessments and results
-  Access reports (read-only)
-  View dashboard and metrics
-  Browse rule sets and configurations
-  Cannot run assessments or make changes

Best Practices

-  **Assign Global Admin role only to trusted administrators** who need full system access
-  **Use Global Operator role** for team members who run assessments but don't need user management capabilities
-  **Grant Global Reader role** to stakeholders who only need to view reports and metrics
-  **Regularly review team membership** and remove users who no longer need access
-  **Monitor email notifications** to stay informed about user management changes

Azure Entra Integration

Benefits

-  **Single Sign-On (SSO)** - Users authenticate with existing Azure Entra credentials
-  **Centralized Management** - Manage users through Azure Entra
-  **Security** - Only users from your subscribed tenant can access ConfigCobra

-  **Seamless Integration** - Works with your existing identity management infrastructure

Requirements

-  Users must be in your Azure Entra directory
-  Users must be part of your subscribed tenant
-  Appropriate Azure Entra permissions for user management

Use Cases

Small Teams

-  Assign Global Admin to IT administrators
-  Use Global Operator for security team members
-  Grant Global Reader to executives for reporting

Large Organizations

-  Multiple Global Admins for different departments
-  Global Operators for compliance and security teams
-  Global Readers for auditors and stakeholders

Compliance Requirements

-  Separate roles for different compliance needs
-  Read-only access for auditors
-  Operational access for compliance teams
